

# Join Illumina

## DNA Sequencing with Illumina!

The advent of high-throughput genomic technologies enables scientists to incorporate Genomics into their research and gain insight into complex processes. Next Generation Sequencing is propelling discovery with new content, new approaches and integrated "omics". During this seminar we will review the basics of Next Generation Sequencing and will also look at innovative uses of Illumina's benchtop sequencers for microbial metagenomics and targeted sequencing approaches. Illumina has end to end solutions to support your research and business objectives. We'll cover the best practices and experimental design from library preparation to bioinformatics analysis.

**When:**

Tuesday, July 11 2017  
12:00 PM-1:00 PM

**Where:**

University of Iowa  
Research Park  
2500 Crosspark Road  
Coralville, IA

Don't miss this opportunity for an update in the latest technology available. Your local Illumina support team will be available for discussion following the Seminar.

This event is free and lunch will be provided. Please RSVP [sbachman@illumina.com](mailto:sbachman@illumina.com)

**Contact your Illumina team for any inquiries:**

Bron Daniel  
Benchtop Specialist
